## **DETAILED ACTION**

### ***Amendment***

1. Receipt is acknowledged of the Amendment filed February 09, 2004.

### ***Remarks***

2. As stated in the remarks of the current amendment, it was indicated in the previous office action that claims 1-12 were in condition for allowance except for the enumerated formal matters. Claims 1-12 and specifically claims 1, 2, 5, 7, 11, and 12 were objected to because of minor informalities. In response thereto, claims 1, 2, 5, 7, 11, and 12 have been amended to overcome the objections. In view of the current amendments and remarks, the present application is now in condition of allowance.

### ***Allowable Subject Matter***

3. Claims 1-12 are allowable over prior art.
4. The following is an examiner's statement of reasons for allowance: The best prior art of record, taken alone or in combination, fails to specifically teach or fairly suggest the food product tracing system, which is disclosed in the present claimed invention. Methods of tracking food products and food distribution tracking are known and taught in prior art. However, the prior art taken of record fails to teach the specific and detailed system of food product tracing which are set forth in the claims. The claimed invention discloses a food product tracing system, which traces food products that come from an original product and are distributed along a distribution channel that has many stages at which material is processed to form a product. The tracing system comprises a storage that includes records created for every food product at every stage. The records

include information for identifying the first stage at which the food product is processed, information for specifying the time period of processing at the first stage, information for identifying the second stage at which the food product processed at the first stage is received as material and information for specifying the time period of processing at the second stage. The system also includes a processor that operates according to programs having a first process and a second process. The first process specifies a target record whose first stage information and first time information are coincident with the stage and the time at which the original product is processed. The second process specifies a new target record whose first stage information and first time information are coincident with the second stage information and the second time information of the previous target record, wherein the second process is repeated until a new target record cannot be specified. Moreover, one of ordinary skill would not have been motivated to come to the above claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
